

# GPS Tracking Instructions

January 2013

Powered by:

## About Airtasker GPS tracking:

GPS tracking allows us to provide firm “proof of completion” to our clients for tasks such as letterbox distribution.

GPS tracking is super simple to use with the Map My Run application and either an iPhone or Android Smartphone.

You can find out more and download the Map My Run application here:

<https://play.google.com/store/apps/details?id=com.mapmyrun.android2&hl=en>

<https://itunes.apple.com/au/app/mapmyrun-gps-running/id291890420?mt=8>

GPS tracking is a requirement of some tasks provided by Airtasker. If you have questions about what tasks require GPS tracking, please contact Airtasker Community Management on 1300 823 218.

## IMPORTANT:

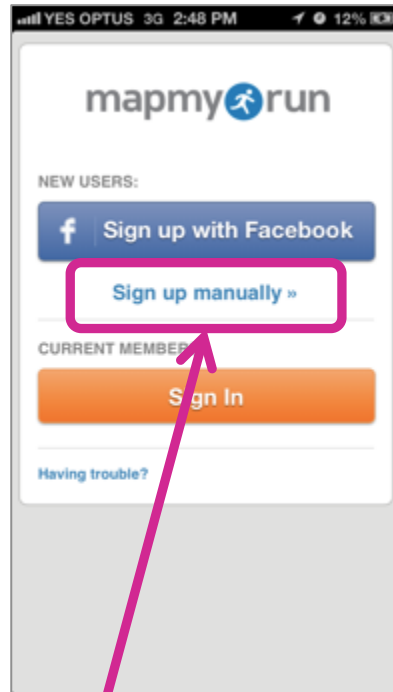

GPS tracking can use up your smartphone's battery power so make sure your phone has 90%+ charge before starting on your task to make sure you don't run out of power!

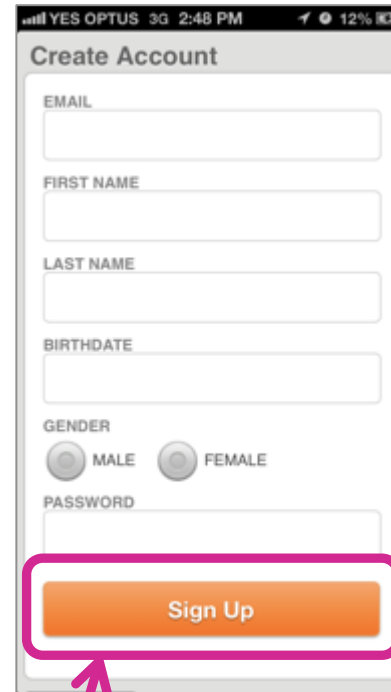

## PHASE 1: Setup Map My Run Account (less than 1 minute)

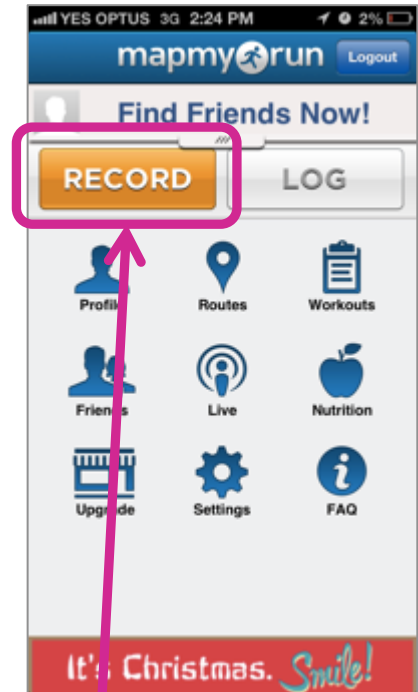

Opening screen.

Unless you already have a Map My Run account, you will need to sign up for an account by tapping here.

Enter your basic information, then tap Sign Up.

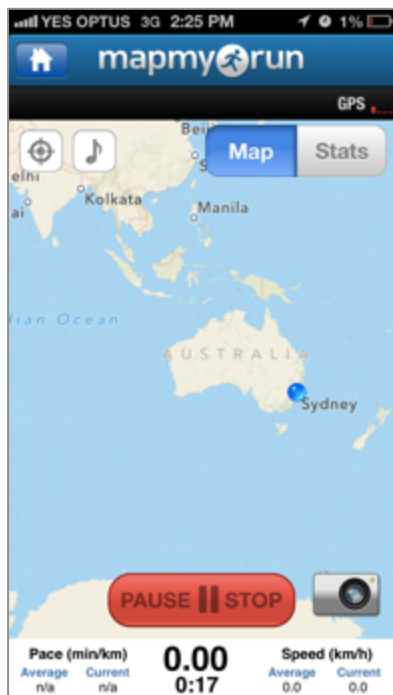

Once you're signed in to your account, tap the RECORD button to start logging your Airtasker distribution route.

# START HERE!

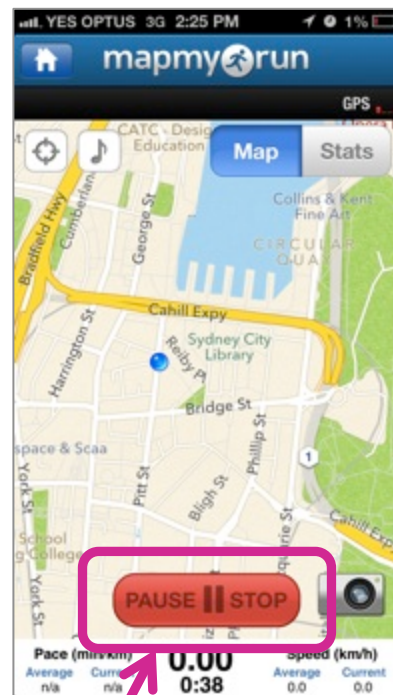

## PHASE 2: Log your distribution route (leave on whilst completing task)

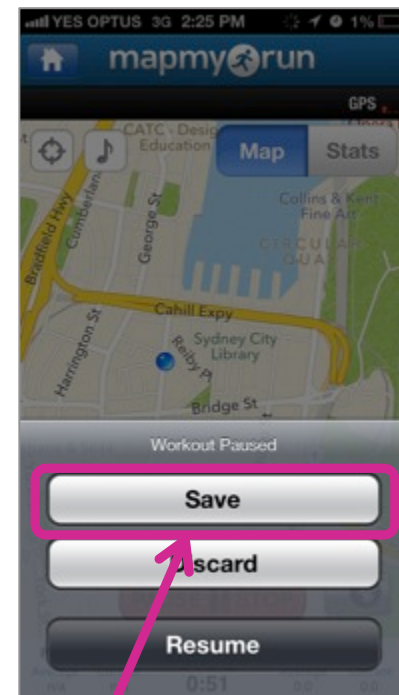

No need to change any of these settings.  
Just tap RECORD to confirm the start of your distribution route.

Map My Run will now start recording your GPS co-ordinates to map your distribution route.

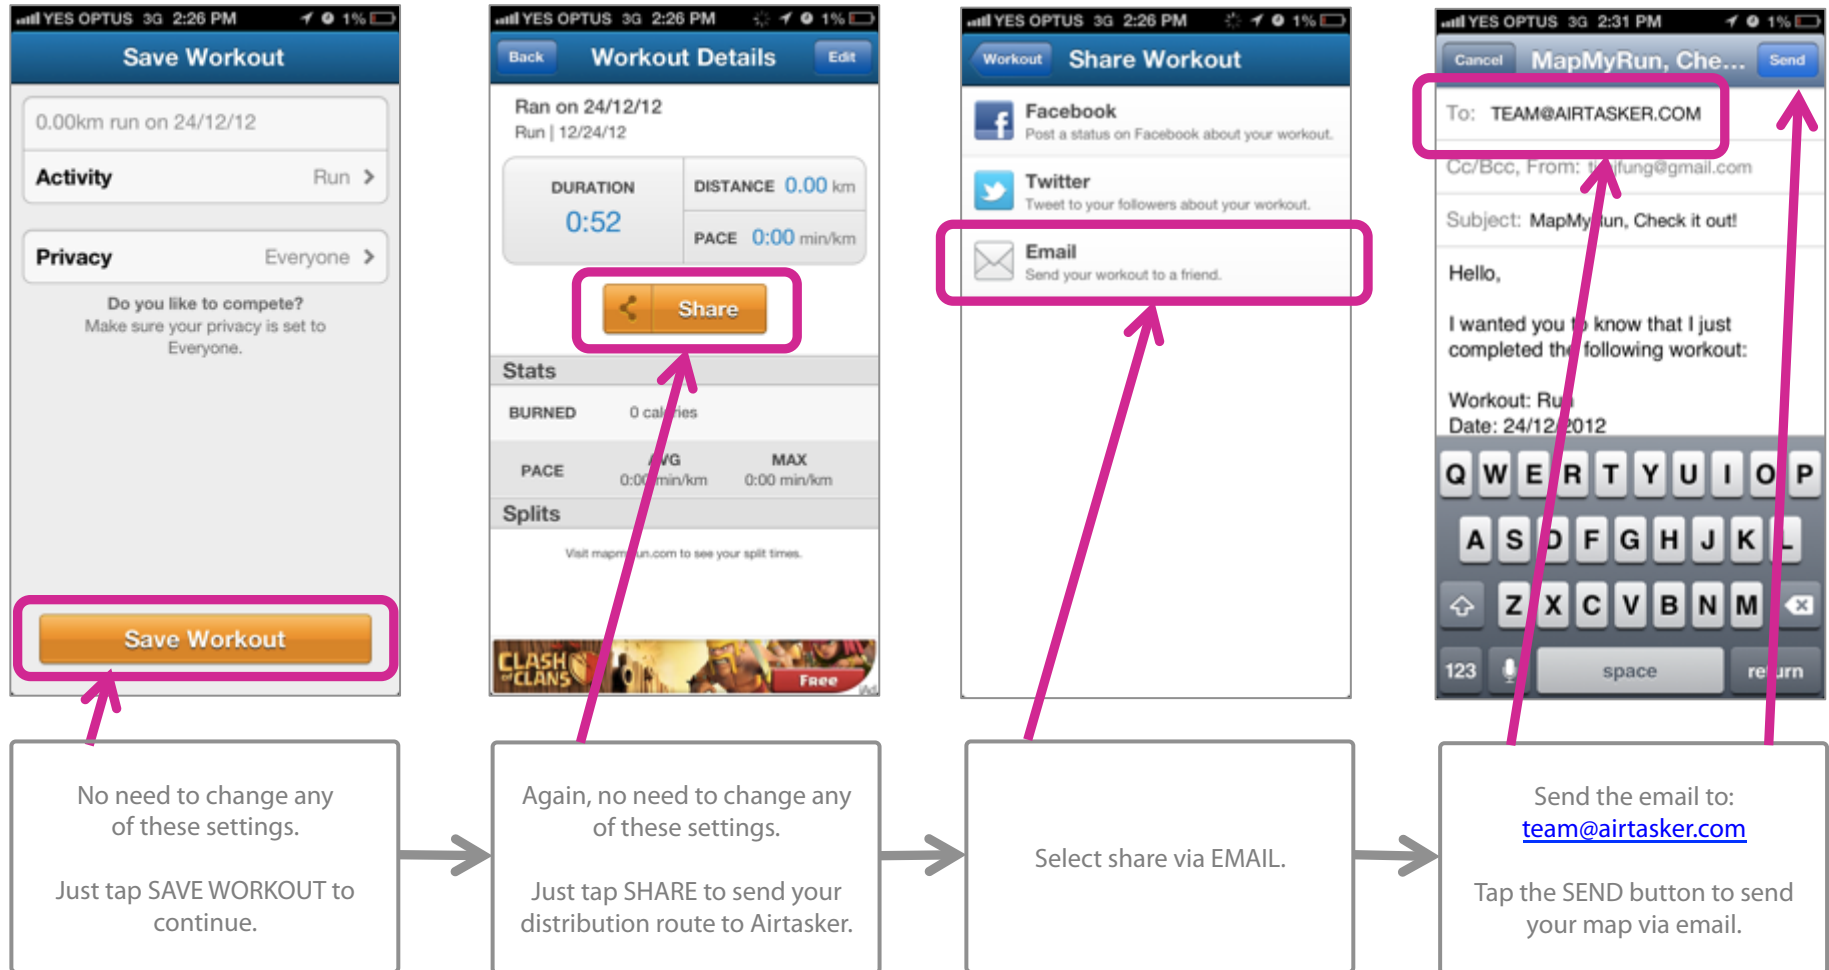

Once you have completed your distribution route, tap the PAUSE / STOP button.

Hit the SAVE button.  
Important: Do NOT tap DISCARD as this will delete your mapped information!

## PHASE 3: Send your map to Team Airtasker (less than 1 minute)

**FINISHED!**
